To the competent authorities

The Russian Federation has started a full-scale war on the territory of independent Ukraine. Ukrainian places and villages are bombed and shelled with rockets, peaceful people. Among them, children, women, and older people are being killed. The number of victims has reached more than a thousand people.

Since the aggressor could not destroy the Ukrainian army, Russia switched the target to the civilian population, critical infrastructure, schools, gardens, medical clinics, and even maternity hospitals. The Russians are creating a humanitarian catastrophe, not giving the population access to water, food, and medicines; they refuse to discuss humanitarian corridors for evacuation.

The western regions of Ukraine have united in order to help the territories that directly resist Russian aggression. The Cabinet of Ministers of Ukraine has appointed the Lviv Regional Rada as the coordinator of humanitarian assistance for Mykolaiv, Kherson, Chernihiv regions, on the territory of which active battles are being conducted today. We have created a coordination center to administer and send humanitarian assistance to those who need it. With great hope, we turn to you to help the Ukrainian people fight against the occupier by providing humanitarian aid to our population.

We bring to your attention a list of goods that are critically needed as of today (the need may vary depending on the already organized deliveries):

We believe that life will overcome death, and light will overcome the darkness!

A senior person for coordination – Yaroslav Hasiak Tel . 096 757 40 27
